\$2,000. FIVE ROOM HOUSE, 7TH

Ward, lot 12x10 rods, good well

and barn.

PROTECT THE GIRLS.

PERILS OF SITTING ON THE LAPS OF
BOW-LEGGED MEN.

There is a case coming up before a

Chicago court that will be of great in-

terest to thousands of people who

have long desired a decision on some

of the points that will be developed.

It seems that a young man, a mem-

ber of one of the Chicago clubs, a

gentleman of wealth and refinement,

is to be sued by the father of a young

woman for \$50,000 damages for in-

juries received while in his society.

The young people had been keeping

company for some years, and the car-

riage of the young man was often

seen in front of the Michigan avenue

residence of the young lady. Last

December he ceased visiting her, and

since that time she has been an in-

valid, and has been treated for a

spinal difficulty, and the father will

go into the courts, it is said, against

his daughter's wish, to have the mat-

ter of responsibility settled. It seems

that the young man is bow-legged,

so much so that it has always been

considered dangerous for anyone to

sit in his lap, for fear they would fall

through on the floor and break some

bones. It is said that the young man

knows his failing, and that he usually

holds any person who may be in his

lap with his arms, so that there is no

danger of falling through, but in his

case he forgot the danger, and in the

girl slip. The father claims that the

young man knowing how fearfully

and wonderfully he is made, should

have adopted precautions, and in his

complaint will swear that on several

occasions he has warned the young

man that he should place a board

across his lap, or some day his par-

entheses legs would let somebody

through. In his answer to the com-

plaint the young man will say that

his legs are just as nature made them,

and that anybody who sits in his lap

takes his chances. He adds that if

the girl had used all the precaution

that one in so dangerous a position

should use, and thrown her arms

around his neck, as others have done,

there need have been no danger; and

while he sympathizes deeply with her

and her family, owing to the alleged

injury, he cannot consider himself

responsible. Of course there are two

sides to every question, and both

sides will have sympathizers.

While we do not wish to take sides

on the question, there are some things

connected with it that it seems a duty

of the press to agitate. The

country is full of bow-legged young

men, going about seeking whom they

may hold in their laps, and the won-

der is that more such accidents do

not occur. There should be some

law to protect girls from bow-legged

men. We throw safeguards around

our trapeze performers by compelling

the managers to place nets under

them, and why should we not pro-

vide by law that the bow-legged young

men should string a hammock under

his boomerang legs to catch those

who may lose their spring balance,

turn a somersault, and fall in the

winter of their discontent. It would

not be pleasant to the bow-legged

young man to be compelled to carry

a hammock when he went to see his

girl, but it would be safer for the girl.

We have known a careful young man

who was bow-legged, to lay a pre-

board, or chess-board, or a sewing

machine on his lap before he

would let a girl sit down among him;

but where one young man is thus

careful there are hundreds who never

think of the other hearts that are li-

man. Besides, the girl probably en-
joyed it. Then they asked him why
he did not wear his diamond breast-
pin on such trying occasions. He
looked at his shirt-front and it was
gone. While he had been allowing
her to chew around his face she had
burgled his shirt. He faints, and
when they brought him to he said:
"Tell my family that I died with my
face to the foe!" The girl, oh, where
was she? She was at a pawn-shop
with the diamond. There should be
a law passed to protect this very use-
ful class of our people from the
mistakes of designing girls.—Hotel
World.

TO THE PEOPLE.

The high tuition exacted by pro-
fessors of music has placed its ac-
quirement in the hands of compara-
tively few, and beyond the reach of
many. Hundreds of dollars are
sometimes spent in obtaining a
knowledge of music, and many
having once made a good start, who
are prevented by circumstances.
The public demand a change. In
the interest of THE PEOPLE we have
arranged a system of classes for the
piano, organ and guitar, whereby
the youth of our city who have not
already engaged teachers, can have
an opportunity of learning music,
with a fair prospect of obtaining a
thorough course at much less ex-
pense than by the old method of
individual lessons. Those prefer-
ring the latter can also be accom-
modated at reasonable rates. We
have noted with pleasure the good
work of Brother Evan Stephens.
His success should encourage us all
to work for the good of the people
at large. The 21 pupils selected
from the Sabbath Schools for one
term on the organ gratis were to
have commenced this week, but
owing to a few Wards not reporting,
those classes will be delayed until
next Monday, when it is hoped all
will be ready. Our terms to addi-
tional classes will be 20 cts. per les-
son for each pupil on either instru-
ment—piano, organ or guitar. Two
lessons per week. Also classes in
Telegraphy at 18 cents a lesson.
Very cheap and useful.

Respectfully,
FLORA SHIPP HILL,
H. J. HILL, Box 227,
First South, opposite Fourteenth
Ward Assembly Rooms.

A Southern California Horse
Farm.

Ex-Governor Leland Stanford's
breeding farm for horses at Palo Alto,
is one of the most complete establish-
ments of the kind in the world. Of
the 1700 acres in the place, one hun-
dred are occupied by the stables,
barns, and small paddocks. The
buildings, at the foot of a gentle rise
of ground, make a small city of them-
selves, inhabited by a population of
nearly 500, who return hither from
their business on the pastures and
race tracks, and have 200 persons
employed in their domestic service.
The spacious barns are uniformly
floored and ceiled up with redwood—
a handsome material, which resem-
bles cedar in effect. They are strewn
with the freshest straw, and kept as
neat as the most unexceptionable
drawing-rooms.

Scions from the stock here raised,
which represents the best thorough-
bred and trotting strains in the coun-
try, are likely to be a most important
influence in improving the breed of
horses throughout the Pacific coast.
It was here that curious experiments
were conducted, at the expense of
Governor Stanford, for arriving at a
better understanding of the speed of
horses by photographing them in
rapid motion. The photographer,
Maybridge, of San Francisco, suc-
ceeded by an ingenious arrangement
of electrical wires, communicating at
the touch of the animal with cam-
eras already prepared, in securing
twelve distinct views of the different
stages of a single stride. The atti-
tudes are of the most unexpected and
curious sort, some of them highly
comic.

Great pains are taken in the raising
and training of the young colts. From
the time of foaling the colts are ban-
died gently and constantly, and are
made as familiar with the touch of
human hands. As a natural conse-
quence they are perfectly tame, gen-
tle, and even affectionate, and never
need breaking. The effect of this
system of training has been apparent
in the performances of some of the
colts which have been publicly
speeded against time. The first no-
table exhibition of speed by a Palo
Alto colt was made on the Bay Dis-
trict Association track at San Fran-
cisco in 1880, when the two year-old
colt Fred Crocker lowered the record
for a one-mile trot to 2' 25 1/4". Last
year Bonita, a two-year-old from Palo
Alto, set the record down to 2' 24 1/4";
and later, at the same trotting ex-
hibition, Wildflower, another two-year-
old from the same farm, made the
mile in 2' 21 1/4" and Linda Rose, a
yearling filly, on the same day added
to the fame of the farm by cutting
down the yearling record to 2' 38 1/4".
It is asserted that there are colts on
the farm which can do even better.
